

LEAP WIRELESS CHOOSES TECHNOCOM'S LOCATION TESTING AND OPTIMIZATION PLATFORM

LAM System Deployed in Field Service Vehicles Automated for E911 Testing

Encino, Calif. – May 21, 2007 – TechnoCom Corporation (www.technocom-wireless.com), a leading provider of wireless location infrastructure solutions and services, announced today that it will deploy its LocationAssurance Manager™ (LAM™) and LocationsAssurance Devices™ (LAD™) throughout Leap Wireless Incorporated's Cricket® service network for automated testing and optimization of the Cricket enhanced 911 (E911) location phone service.

The LAM™ system uses patented automated data collection and sophisticated accuracy reporting to allow Cricket engineering and operations personnel to test, verify, calibrate and evaluate the performance of a location network. LAM™ applications include E-911 Quality of Service, for automated OET-71 compliance testing and reporting and NetworkAssisted Calibration™ (NAC) for accelerated AFLT calibration and performance optimization. LocationAssurance Devices (remote, intelligent, mobile test units) will be installed into Cricket field service vehicles to automate the in-field test call and empirical test data collection using TechnoCom's patented location data collection process.

"We are pleased that Cricket has selected LocationAssurance Manager for performance and optimization of their location network," said Masoud Motamedi, president of TechnoCom. "The need for superior location network quality of service is critical as the wireline paradigm changes and subscribers begin to rely more and more on their wireless mobile phones for sole means of communications. The LAM system contains advanced features for configuration management and fault detection, enabling our customers to provide their subscribers with superior levels of service and at the same time reduce operating costs and mitigate business and regulatory risks."

About TechnoCom Corporation

TechnoCom offers a portfolio of advanced wireless location solutions and services for communication service providers, major system integrators, automotive manufacturers and government agencies. TechnoCom solutions analyze network and service performance from the customers' perspective, bridge the gap between location-based services infrastructure and applications and bring to market reliable, multiband wireless communications solutions for enhanced consumer safety and mobility. Founded in 1995, TechnoCom has been among the 50 fastest-growing technology companies in Los Angeles, selected by Deloitte for four consecutive years. The company's customers include some of the world's largest wireless operators, systems integrators and automotive OEMs. For more information, visit www.technocom-wireless.com.
