

TechnoCom Corporation and Card Access, Inc. Form Strategic Alliance

Companies Partner to Bring to Market 5.9 GHz DSRC Solutions

Encino, Calif. & Salt Lake City, Utah.— March 27, 2007— TechnoCom Corporation (<http://www.technocom-wireless.com>), a leader in 5.9 GHz Dedicated Short Range Communications (DSRC) technologies for Vehicle Integration Infrastructure (VII) applications, and Card Access™ Inc., a leading developer of wireless communications products, have formed an alliance to establish Card Access as a TechnoCom compatible design center providing 802.11 compliant radio devices that are designed to work with TechnoCom's IEEE 1609 and 5.9 GHz DSRC/ WAVE Software.

As part of the alliance, Card Access is offering hardware and custom development of hardware solutions for WAVE/DSRC. TechnoCom provides software solutions for WAVE/DSRC and VII to interface with the roadside and intelligent intersection equipment and wireless communications interfaces to the vehicles. Both companies have agreed to distribute each other's technology creating opportunities for incorporating enhanced functionality and interfaces to TechnoCom's DSRC solutions.

"Card Access' goal in working with TechnoCom is to bring together world-class wireless and engineering expertise for the benefit of our joint customers," said Kent L. Hansen, president and chief executive officer of Card Access, Inc. "This agreement will help put innovative technology designs and global remarketing capabilities to work for an even broader customer base."

"With Card Access, TechnoCom has access to a proven engineering team and technology development center that allows us to provide robust and high-performance wireless solutions to our customers in automotive safety and traffic management," said Masoud Motamedi, president of TechnoCom. "This alliance further solidifies TechnoCom's position as a VII US DOT leader and provider of technology implementing DSRC/ WAVE systems."

"There are approximately 200 million vehicles registered in the U.S with 50 million on the road at any given time. The U.S. DOT Federal Highway Administration anticipates that there will eventually be a few hundred thousand roadside units implemented to establish a nation-wide Vehicle Integration Infrastructure footprint," said Bill Hughes, principal analyst, wireless technology at In-Stat. "This alliance can quickly bring to market the 5.9GHz DSRC solutions necessary for the transportation and automotive industries developing vehicle to vehicle and vehicle to infrastructure technologies."

TechnoCom works with companies that provide transportation infrastructure solutions and wireless carriers to bring reliable wireless technology to the market, providing software solutions and services designed for the transportation and automotive industries. TechnoCom's customers include systems integrators, automotive equipment manufacturers and suppliers, and federal, state and local government agencies within the mobile communications, telematics, VII, DSRC, infotainment and public safety markets.

About TechnoCom Corporation

TechnoCom is a leading provider of solutions to enable wireless services and assure their ongoing performance. TechnoCom offers a portfolio of wireless infrastructure solutions and emerging wireless technologies to network operators, service providers, system integrators and government agencies. Founded in 1995, for four consecutive years TechnoCom has been among the 50 fastest-growing technology companies in Los Angeles selected by Deloitte & Touche. The company's customers include some of the world's largest wireless carriers and integrators including, among others, Alltel, ARINC, AT&T (Cingular), Q-Free, Raytheon, SAIC, Sprint Nextel, SunCom Wireless, Telefonica Empresas S.A., Telus, Vehicle Infrastructure Integration Consortium (VIIC) and Verizon. TechnoCom has received investments from Timeline Ventures, Titan Investment Partners, Third Point Management and iSherpa Capital. For more information, please visit www.technocom-wireless.com.

About Card Access, Inc.

Founded in 1995, Card Access™, Inc. is a leading developer of wireless communications products. World-class organizations in the medical, military and home consumer markets rely on Card Access for development of high-performance, low-power, miniaturized, mobilized and ruggedized wireless communications solutions. Card Access, Inc. is a privately held company headquartered in Salt Lake City, Utah. For more information, visit www.cardaccess-inc.com or call 1.801.748.4900.
